EXPERIENCE

Full Stack Software Developer

CoinSeason Capital Inc

📅 04/2018 - 04/2019   📍 Richmond, BC

Technologies: AWS, JavaScript ES7, TypeScript, HTML, CSS/SASS, Angular, REST APIs, Node.js, Serverless

- Created and maintained a scalable system architecture for a cryptocurrency exchange platform
- Led team of 3 to build and beautify a responsive front-end interface using Angular framework
- Planned and created RESTful web services using AWS API Gateway + Lambda and Serverless framework
- Utilized MySQL and Amazon RDS for processing data requests, optimizing database schemas and data migration
- Designed the referral program which increased user registration rate by 22%
- Created admin portal that reduced cost for user KYC and transaction verifications by 53%

Junior Software Developer

Ensemble Systems Inc

📅 04/2016 - 02/2018   📍 Richmond, BC

Technologies: Java, JavaScript, HTML/CSS, jQuery, AEM, Cordova, Swift 3, Xcode, Knockout.js, AEM, Microsoft Azure, Microsoft Cognitive Services

- Wrote modern, performant, maintainable code for internal projects and a diverse array of clients, including Microsoft, Sony and Adobe
- Worked with a variety of different languages, platforms, frameworks, and content management systems such as JavaScript, Knockout.js Swift 3, AEM, Java, Cordova, and Microsoft Azure
- Designed and updated layouts to meet usability and performance requirements for web, mobile, AEM and DMS applications
- Communicated with multi-disciplinary teams of engineers, designers, producers, and clients in a Scrum Agile-driven environment
- Participated in more than 4 projects per year from initial research and conceptual design through testing and implementation phases

CERTIFICATION

React - The Complete Guide (2020)

Used ReactJS, Redux, Hooks, and Reach Router to create an application that communicated with Firebase Realtime Database via axios

EDUCATION

Bachelor of Applied Science - Computer Engineering

University of British Columbia

📅 2010 - 2015   📍 Vancouver, BC

PROJECTS

Covid-19 Tracker

Web app built with React and Node.js to visualize the spread, recovery and death toll of Covid-19 on a global scale, using Diease.sh API

Trailer Viewer

A web app built using ReactJS that plays the trailers for movies and TV show titles filtered by categories, using TMDb API

TECHNOLOGIES

Frontend

| JavaScript (ES7) | HTML | CSS/SASS |
| TypeScript | Angular | ReactJS |

Backend

| MySQL | DB Design | Serverless |
| Java | Node.js | REST API |

Environments

| Git / GitHub | Visual Studios | AWS |
| Scrum Agile | BitBucket | AEM |
